Hindi

About Me

I'm a Full Stack Developer with 2.5+ years of experience in building dynamic and responsive web applications. I specialize in both front-end technologies (HTML, CSS, JavaScript, Bootstrap, jQuery) and back-end development (Laravel, PHP, MySQL), delivering seamless and scalable solutions from concept to deployment.

In addition to core development, I have hands-on experience in CRM automation, streamlining workflows, integrating third-party tools, and enhancing user engagement through efficient customer relationship management systems. I'm also skilled in API integration and performance optimization to ensure high-performing, maintainable applications.

WORK EXPERIENCE

Aug 2022 - present

BajarangiSoft

- 2.5 years of full-stack Laravel experience in building and maintaining both front-end and back-end systems across 5+ projects, including payment gateway integrations.
- Ability to work as individual as well as within a team.
- Used SMTP mailer of php, to send mail to users.
- Created APIS for mobile application based on requirements.
- solid understanding OOP and model, view, controller (MVC).
- Implemented stripe, cashier, paypal billing payments.
- Capability of client handling and requirement analysis.
- Working experience of handling APIs; knowledge of RESTful.
- Planning design and implementation of web application and designing website layout using HTML CSS Bootstrap.

PROJECTS

Sanctus

PHP, Laravel, MySQL, JavaScript, Bootstrap, Ajax
ROLE : Admin, Client & Contractor

Developed and maintained the backend infrastructure of a virtual cemetery platform, enabling digital memorial creation, service ordering, and interactive user features. Designed and implemented secure RESTful APIs, integrated multi-role access control for clients, contractors, and administrators, and optimized database performance for high availability and scalability.

Responsibility

- Integrated Spatie MediaLibrary for uploading and managing images and videos.
- Created a fully functional admin panel for content moderation, user management, order tracking, and service configuration.
- Integrated Firebase Cloud Messaging (FCM) to deliver real-time push notifications for order updates and system alerts across both web and mobile platforms.
- Implemented a secure and scalable multi-role user system (Client, Contractor, Administrator) to support various workflows and permissions.
- Implemented payment gateway integration for virtual offerings and service purchases (e.g., flower placement, tombstone cleaning).

Torkehub

PHP, Laravel, MySQL, JavaScript, Bootstrap, Ajax
ROLE : Admin, Customer, Agent, User

TorkeHub is a powerful suite of AI-driven tools designed to help businesses streamline operations, manage leads efficiently, and automate sales and marketing processes. This intelligent platform integrates advanced CRM capabilities with cutting-edge marketing automation to drive performance and growth.

TORKEHUB AI CRM transforms customer relationship management by seamlessly automating workflows, delivering precision, boosting efficiency, and enabling highly personalized interactions. Experience the next generation of CRM—where AI-powered technology accelerates your business success.

Responsibility

- Developed and maintained core CRM functionalities, including lead management and workflow automation.
- Integrated AI-based modules to enable personalized customer interactions and intelligent sales forecasting.
- Implemented email automation workflows for marketing campaigns, including behavior-triggered emails and scheduled bulk messaging.
- Enabled users to add sub-users and agent accounts to help manage CRM tasks and email campaigns efficiently within the system.
- Integrated multiple payment gateways including PayPal and Razorpay, ensuring secure and seamless transaction processing.
- Integrated Instagram and Facebook APIs to enable users to connect their social media accounts, allowing them to publish posts directly from the platform and automate direct message responses based on predefined conditions and conversation flows.
- Added a built-in messenger feature to facilitate communication between users and agents, supporting file sharing and audio recording for enhanced collaboration.
