PROFESSIONAL SUMMARY

Results-driven Full Stack Developer with 3.5+ years of experience building scalable web applications, RESTful APIs, and automation platforms. Core expertise in Laravel and PHP, with recent hands-on experience in React.js, Node.js, and TypeScript. Proven across 6+ projects spanning CRM automation, payment gateway integration, AI-powered tools, cloud telephony, and social media management. Strong communicator with direct client-handling and cross-functional team experience.

TECHNICAL SKILLS

Backend (Primary)	PHP 7.x/8.x, Laravel 8/9/10, RESTful API Development, MVC, OOP
Frontend (Primary)	HTML5, CSS3, Bootstrap 4/5, JavaScript, jQuery, AJAX
Full Stack (Recent)	React.js, Node.js, TypeScript (3+ Months, Active)
Database	MySQL, Eloquent ORM, Query Optimization
Integrations	Stripe, PayPal, Razorpay, Twilio, ElevenLabs AI, Firebase FCM, OpenAI API, Instagram/Facebook/LinkedIn/Twitter APIs
Tools & Practices	Git, GitHub, Laravel Queues, Cron Jobs, Spatie MediaLibrary, Laravel Cashier, SMTP Mailer

WORK EXPERIENCE

Full Stack Developer

BajarangiSoft, Bengaluru, Karnataka | August 2022 – Present (3.5+ Years)

- Delivered **6+ production applications** independently and within teams — spanning CRM, gaming, social media automation, and cloud telephony domains.
- Architected and deployed **secure RESTful APIs** for web and mobile clients, reducing integration turnaround by ~40% per feature.
- Implemented **multi-gateway payment systems** (Stripe, PayPal, Razorpay) enabling reliable transactions for 1,000+ users.
- Built **email and SMS automation workflows** with behavior-triggered campaigns, improving user engagement by ~25%.
- Integrated **AI-powered tools** including OpenAI API (content generation, chatbot) and ElevenLabs (voice agents) into production platforms.
- Developed **cloud telephony solutions** using Twilio for inbound/outbound calling and SMS workflows in a React.js + Node.js environment.
- Led social media API integrations (Facebook, Instagram, LinkedIn, Twitter/X) enabling **multi-platform post scheduling and DM automation**.
- Implemented **role-based access control**, multi-level user hierarchies, and permission systems across all major projects.
- Optimized database queries and background job processing using **Laravel Queues and Cron Jobs**, improving platform performance significantly.

KEY PROJECTS

Atlas — Auto Glass Service Management Platform

Role: Full Stack Developer (Node.js, React.js, TypeScript) | **Duration:** 3+ Months — Ongoing

- Built **Twilio-based inbound/outbound calling and SMS workflows** for CSR teams managing auto glass service requests.
- Integrated **ElevenLabs AI voice agents** to handle customer calls automatically when agents are unavailable, with customizable AI agent management.
- Developed a **floating communication widget**, chat management with filtering/categorization, and call/job/chat history tracking modules.
- Built **spam vs genuine conversation classification** workflows and automated telephony onboarding for new accounts.
- Delivered full-stack features using **React.js, Node.js, and TypeScript**, collaborating via GitHub PRs and branch workflows.

Tech: Node.js, React.js, TypeScript, Twilio API, ElevenLabs API, REST APIs, Git, GitHub

TorkeHub — AI-Powered CRM & Marketing Automation Suite

Role: Lead Laravel Developer | **Duration:** 1+ Year | **Team:** 4 Members

- Led development of a **multi-platform social media management system** supporting Facebook, Instagram, LinkedIn, Twitter/X, and YouTube — with post scheduling, bulk publishing via Excel, and media asset management.
- Integrated **OpenAI API** for chatbot assistance, email generation, caption writing, content summarization, translation, and tone modification.
- Built **CRM modules** (Leads, Accounts, Contacts, Opportunities), email/SMS automation, an in-house email template builder, and real-time user-to-user messaging.
- Implemented **queue-based processing** for background jobs and cron-based scheduling for automated content publishing.
- Integrated **Stripe, Razorpay, and PayPal** for subscription billing; built reporting dashboards and business analytics modules.

Tech: Laravel, PHP, MySQL, JavaScript, jQuery, Bootstrap, OpenAI API, Stripe, Razorpay, PayPal, Social Media APIs, Queues, Cron Jobs, Git

OTC Matka — Gaming Administration & Result Management Platform

Role: Sole Laravel Developer | **Duration:** 6–8 Months

- Solely built a **comprehensive admin platform** for a gaming ecosystem covering user management, wallet/token transactions, result publishing, and operational analytics.
- Engineered a **result management workflow** where published results directly triggered wallet recalculations, transaction updates, reporting dashboards, and audit trail synchronization — ensuring consistency across all data layers.
- Developed **profit & loss dashboards**, referral management, role-based access control, notification systems, and historical reporting modules.
- Optimized **database queries and backend processes** to handle high-volume transaction tracking with performance and accuracy.

Tech: Laravel, PHP, MySQL, JavaScript, jQuery, Bootstrap, Git, GitHub

Sanctus — Virtual Cemetery & Digital Memorial Platform

Role: Backend Developer | **Duration:** ~6 Months

- Architected backend for a digital memorial platform with **multi-role access** (Client, Contractor, Admin), service ordering, and FCM push notifications achieving <2s latency.
- Integrated **Spatie MediaLibrary** for image/video management and payment gateways for virtual service purchases.

Tech: Laravel, PHP, MySQL, JavaScript, Bootstrap, AJAX, Firebase FCM
